

Birdwatching

We still don't know why the Nazca people drew these large geometric shape, but it's clear that they took inspiration from the **birds all around**. Maybe if you keep an eye out you too can determine what the local wildlife is **saying**. There could be some sort of **signal to flag** for future reference.

This is a location puzzle. You may not be able to solve this without observing some local wildlife. You can find what you need between Dig Sites BETA and GAMMA.
