

Language Arts

The Rosetta Stone was an extremely valuable work in helping us connect ancient languages. There's a rainbow of colors on the surface, but as you dig deeper, you'll need to Remember Your Basics.

This is a physical puzzle. You can find it between Dig Sites ALPHA and BETA. The stone is the entire puzzle and can be solved anywhere.

Watertown is a highly multicultural city, well known for its Armenian population. On your walk, you'll find some art memorializing an Armenian artist. You should pause and take this in, because it's really cool. After that, search nearby for a pile of Rosetta Stones. Take only one. After you've solved it, feel free to return it to GC if you don't want to take home a new pet rock.

Cluephrase: _ _ _ _ _ _ _ _ _ _

Final answer: _ _ _ _ _

(The remainder of this page has been left blank as general-purpose scratch space)
